

## Body Memory - how to play.

Print 2 copies of the game and laminate them.  
To help your game last longer you could print it on  
to card or glue your 2 copies onto card before you  
laminate it. Cut all the pieces out.

To play the game place all pieces face down.  
Children take turns to turn 2 pieces over to find  
matching cards. If the cards don't match turn them  
face down again. Children need to try and  
remember where each card is.
